

# WARM UP Questions

• List the properties of solids

Ans. A solid has a definite shape and volume

• Solids in general have high density

• In solids intermolecular forces are strong.

• Diffusion of a solid into another solid is extremely slow

• Solids have high melting points. Related topic

• List the properties of liquids

## 45- Capillary Action.

Cohesive and Adhesive Forces.

Contact angles

Surface Tension.

· Unusual properties of water

· Vapor pressure.

· Viscosity viscosity is another type of bulk property defined as a liquid's resistance to flow

· Wetting Agents
