

## Home Assignment,

Q [ Let's Discuss (pg 58) ]

a) Yes, the literacy rates of the population have increased since 1951 as shown below:

Literacy in 1951	Literacy in 2001
Male - 28	Male - 75
Female - 11	Female - 52

b) India has the highest literacy rates in 2001.

c) Because traditionally people were believing in educating only males as they were the important members of home family. They used to give importance to only males.

d) Because traditionally men are being given importance. People's thinking that men should work outside and women are only for taking care of house and housework.

e) It is calculated on the basis of the formula i.e., the no. of literate people divided by the population multiplied by 100.

Between 95% to 20%

Do you think the classification of economic activities into primary, secondary and tertiary is useful?

Explain how?

It is useful as it helps in estimating the relative importance in the growth in GDP of the economy.

Classifying in such a way helps in calculating how much goods and services are produced and how many people work in each sector.

Make a long list of all kinds of work that you find adults around you doing for a living. In what way can you classify them? Explain your choice?

Primary sector	Secondary sector	Tertiary sector
Labour	Engineering	Teacher
Milk man	Shopkeeper	doctor
Sweeper	Painter	Engineer
		Nurse
