"Albert Einstein" character sketch.

He was the spark of genius even at a young age. His miserable years at school revealed how a talented creative mind feels trapped and cloistered in the rigid system of education. He had a curious mind. He was a curious boy. He had a frank and honest temperament and was quite sensitive and emotional. He was considered a rebel by most of his teachers. He didn't compromise and adjust to the system of education which encouraged learning without understanding.
