

~~Q~~

Delhi is further away from the equator than Chennai. But summer in Chennai is not as hot as ~~as~~ in Delhi. What are the reasons?

~~A~~ Delhi is further away from the equator than Chennai. But summer in Chennai is not as hot as in Delhi, because Chennai is located near the sea & it has a moderate climate. So there is neither too hot in summer nor too cold in winter.

On the other hand Delhi is located in the interior of continents & it has an extreme climate. So there is very hot in summer & very cold in winter.

That's why Delhi is more hotter than Chennai although Delhi is further away from the equator than Chennai.
