ans. The dangerous insect present in the forests of the DRC causes sleeping sickness is the tsetse fly.

8. Describe the way the tribes of the DRC lives.

ans There are about 200 tribes in the DRC having its own customs. Some tribes such as the BamButi, Twa and the Babinga people are composed of peoples who are short in height. They traditionally get their food by hunting animals and gathering plant foods. They live in camps only for a few weeks. Then they move to a

new place. They make huts out of branches and leaves. Since the weather is hot and humid the people of these tribes do not wear many clothes but on special occasions, they wear colourful costumes, they enjoy singing, dancing & telling stories.
