

Q FSH controls the spermatogenesis of sex cells or gametes.

Home Assignment

1. Write the locations of master gland. Why it is named so?

Ans. The master gland is located in the brain. It is named so as it controls all the other glands in our body.

2. Write in a tabular form name of the gland, location and hormones secreted by them.

Gland	Location	Hormone
Thyroid	Neck, below the larynx	Thyroxine
Adrenal	above kidney/abdomen	Adrenaline
Pancreas	Behind the stomach	Insulin and Glucagon
Pituitary	Below the Brain	GH, TSH and FSH

DIQ: Functionings of Pituitary Gland
