

Draw important latitudes with their degrees and justify how it is important?

- Arctic Circle  $66\frac{1}{2}^{\circ}N$
- Tropic of Cancer  $23\frac{1}{2}^{\circ}N$
- Equator  $0^{\circ}$
- Tropic of Capricorn  $23\frac{1}{2}^{\circ}S$
- Antarctic Circle  $66\frac{1}{2}^{\circ}S$

The ~~parallel~~ latitudes on the earth are the imaginary lines. These lines are important because they help people to navigate ~~the~~ to measure time. They also help to differentiate the temperature zones of the earth.
