Ch-magnetism

* Define natural magnet.

Ans The magnets that are naturally
occur and found in nature is
called natural magnet. Ex magnetite,
lodestone.

* Differentiate magnetic and non-magnetic
substance.

Ans Magnetic substances \Rightarrow Materials which
get attracted
towards magnetic
materials are called
magnetic substance.

Ex Copper, iron, Nickel.

*) Non magnetic materials → The ~~material~~ materials which don't get attracted towards magnets are called non-magnetic materials.

Ex) Wood, paper, plastic, etc.
