

## The River

River is a very important soft water source our country india is naturally blessed to have many rivers.

In most of the cases, rivers start at the highest point in a particular area again, It's very important source for fresh water. It's quite surprising to know that rivers drain almost 75 percent of the earth's land. River is important because it's habit for many civilizations. For some countries river is the biggest water of transportation. River is the best of recreational opportunities. Farming or agriculture would have been greatly affected without it. You should also know that rivers are the vital carriers of many nutrients.

on the whole, the small society of ram  
eswaram was very rigid in terms of  
the segregation of different sects. The  
this too was so bad I climb like me?  
child play. This is you wait and see. He  
got out the us you the space and  
his drawers and his shirt me. They  
plan B. stand out of the way. Mum said  
Don't you Argue ok? Fall again sad.  
what Funny joke! Then he swung him  
self. Then he fall down tree trunk.
