1. What do you know about stone age?

Ans The period from around 2.5 million years ago to 4000 BCE is known as stone age. The stone age is divided into the Paleolithic (old) Mesolithic (middle) & Neolithic (new) ages. Stone Age was a period before humans could write, own knowledge of this period comes from artifacts.

2. What are the classification of the stone age?

Ans The classification of the stone age is Paleolithic (old) Mesolithic (middle) & Neolithic (new) stone ages.

3. What are major sources of information of stone age?

Ans The major information of stone age came from artifacts.

4. What do you mean by artifacts?

Ans Artefacts are archaeological source like the bones, tools, weapons, cave paintings & pottery etc. that helps to know about the past.

5. ~~Why hunters~~ are early humans called early hunters & gatherers?

Ans Early ^{homo} ~~homo~~ sapiens used to roam in search of food & used to ~~hunt~~ ^{gather} animals for food.

They also gathered wild nuts, berries & grains for their survival as hunting couldn't support the growing population.
