1) What is error of parallax?

Ans) Parallax error is different reading ~~the~~ when the eye is kept at different position.

2) Explain stepwise how to measure the length of an object.

Ans) ~~First take the scale & the object & place them side by side & measure it by the scale starting from 0.~~

Step 1 take the scale & object & put it side by side by the 0 point.

Step 2 measure from the zero point.
