

Assignment

①	Example	What does this show
	Imagine what would happen if farmers refuse to sell sugarcane to a particular Sugarmill. The mill will've to shut down.	Secondary sector depending upon the primary sector.
	Imagine what would happen if the companies refuse to buy cotton or it's items from Indian market. Value of cotton will decrease, the farmers may go bankrupt, if they want quickly switches to another crop. Cotton prices would fall.	Primary Sector depending upon the Industrial or Secondary sector.
	Farmer buys many equipments for his field, like- tractor, pumps, harvesters etc and some fertilizers, pesticides etc. If suddenly price of these equipments and fertilizers rise up. Cost of cultivation of farmer will be high and profit will be low.	Primary Sector depending upon Secondary Sector.

People working in service sector and industrial sector need food.

This shows that every sector depends upon ~~each~~ one another.

Imagine if there is a strike by the transporters and lorries refuse to take vegetables, milk etc. In Urban areas there would be food scarcity and farmers wouldn't be able to sell their foods.

Q1) Explain the difference between Primary sector, secondary sector and tertiary sector using e.g other than those mentioned in the text.

Ans → Primary Sector	Secondary Sector	Tertiary Sector
<p>★ When we produce goods by exploiting the natural resources, it is an activity of Primary Sector.</p> <p>☛ E.g → Fishing</p>	<p>It deals with the not production of the natural products being changed into other forms through manufacturing.</p> <p>E.g - Manufacturing of Animal Products.</p>	<p>These support the Primary & secondary sector through providing services to them.</p> <p>E.g - Engineer, doctor etc.</p>

Qii) Students are often classified into primary and secondary or junior and senior? What is the criterion i.e. used? Do you think this is a useful criterion? Discuss.

Ans) Students are classified into primary and Secondary or Junior or Senior, on the basis of the class they study.

Qiii) Do you think the classification of economic activity into primary, secondary and tertiary useful? Explain how?

Ans) Through these classifications we could know that which type of activity comes under which group. This also help in knowing the which group contributes more to the country's economic. So, I think these classification is useful.

Qiv) Make a long list of all kinds of work that you find adults around you doing for a living.

Ans) Engineer → Tertiary
Merchant Navy → Tertiary
Farmer → Primary
Production Manager → Secondary
Construction Worker → Secondary
Project Manager → Secondary

I want to ~~become~~^{be} a Neurologist:
