## Homework

Q) Write the summary of your favourite movie in the form of a story, with your plot, characters and setting?

Ans) My favourite movie is 3 Idiots. This is a story of the three engineering students in Imperial College of Engineering who find their friendship as making themselves like idols but learning from it. The main cast were Farhan Akhtar acted by R Madhavan, Raju Rastogi acted by Sharman Joshi and Rancho acted by Amir Khan. The main reason why I like this movie, in spite of being a comedy, carries a message and it's about humanity. Other than that, I like this movie because it conveys about the movie because it conveys about our schooling system. Nowadays rote memorization isn't the only thing, it is the understanding of the subject that is needed more than that. It also conveys about expectations of parents and teachers from students. That it's about what only truly enjoys doing than to do what earns more. That great are not everything. Moreover, in this movie, it shows me that we must care and love our family. I really love my family. I always

Keep my promises for them, to raise them from poverty and to travel with them around the world. What I wanted for my family is to make them happy. Like Raju we must want to free our family from poor quality that we had. Still I am happy through my family is striving crisis because I believe that what's important is you're together with your family and you're having fun. This film influences me so much especially the quote "All is well" that always comes out from the mouth of Rarano. I believe that whatever circumstances may lead, if there is any obstacle I may encounter I will just say this and I will be calm because I believe that there must be a solution in every problem.
