## HOMWORK

★ Delhi is further away from the equator than Chennai. But summer in Chennai is not as hot as in Delhi. What are the reasons for this?

Ans - Delhi is further away from the equator than Chennai. But summer in Chennai is not as hot as in Delhi because there is a coast near Chennai from which the cool air from the coast blows to the land, which keeps the climate moderate neither too hot nor too cold whereas Delhi has no coast near it, so that is why it is hot in summer than Chennai.
