

# HOME ASSIGNMENT.

## The CIRCULATORY FLUID IN OUR BODY

- (1) What are the different types of blood group?
- (2) Which blood group is universal donor and why?
- (3) Name the blood group which is universal acceptor?

### Answer

(1) ans:- There are 4 main blood groups  
A, B, C, D

(2) ans:- For emergency transfusions, blood group type O negative blood is the variety of blood that has the lowest risk of causing serious reactions for most people who receive it. Because of this it's sometimes called the universal blood donor type.

(3) ans:- O- and AB+
