

HW

Paragraph on TV

Few inventions have had more effect than the television in our lives. It has revolutionized the way we used to view content. With the invention of T.V, people started staying home a lot more than before. This is because they ~~can~~ could access whatever they wanted right at their homes. This flexibility allowed them to spend more time with their families. TVs have played a great role in the way we get our information. Modern-day TVs are much different from the ones that were used earlier. The earlier versions were known as mechanical Televisions and were heavy and bulky. When compared to the slim, LCD and LED display TVs that we have today, they seem like a faraway era's device. But, the TV also has its share of demerits. It has made people lazy and inefficient. Children especially prefer to stay at home rather than go out to play. Therefore it is important to remember that no matter how convenient the TVs are, they cannot be replaced with outdoor work. We ~~had~~ have to create the perfect balance between TV time and the outdoor lifestyle in order to lead a healthy life.
