

## Geography Worksheet

- A) The Earth is spherical in shape.
- A b) A globe is a miniature form of Earth.
- A c) The latitudinal value of Tropic of Cancer is  $23\frac{1}{2}^{\circ}\text{N}$ .
- A d) The 3 heat zones of the Earth are :-
- The Torrid zone.
  - The Temperate zone.
  - The Frigid zone.
- A e) Parallels of latitude - The imaginary lines that run horizontally across the surface of Earth are called parallels of latitude.
- Meridians of longitude - The imaginary lines that run vertically across on the surface of the Earth, from north to south pole are called meridians of longitude.
- A f) The sun is exactly over the head once a year, on all the latitudes between these 2 tropics. The sun rays fall exactly over the head hence the Torrid zone receive the maximum amount of heat.
- A g) In India, the standard meridian is  $82.5^{\circ}$ . So, the time difference between London and India is  $82.5 \times 4$ , which is 330 mins (5 hrs 30 mins).
