

Q- The Earth is rotating, why do we not feel this movement?

Ans) Earth moves very fast, it rotates 1000 miles (1600 kilometres) per hour and ~~rotate~~ revolves at a speed of 6700 miles (107,000 kilometres) per hour. We can't feel it because the speed of earth never change it is same like this every time we can't feel any motion if the speed are constant.
