Write a note on Macavity in about
30-50 words.

Macavity is a mystery cat and also known as 'Hidden Paw'. He is a master mind. He can defy and break any law. Even the Scotland yard and Flying Squad of England have failed to arrest. He has even the nature law, like the law of gravity. He is thin and tall cat and has sunken eyes. His coat is dusty and whiskers ^{disordered} uncombed. He moves like a snake. Overall, Macavity is a devil in cats shape.
