

## 4.5 Greatest and Smallest Numbers

### (a) Greatest number

Consider the numbers given below :

**98, 95, 90, 76, 80**

To find the greatest number among these, we will arrange them in ascending order.

$$76 < 80 < 90 < 95 < \textcircled{98}$$

The last number we get is the greatest number. So 98 is the greatest number here.

### Exercise

#### 1. Circle the greatest number in each group.

(a) 71,  $\textcircled{98}$ , 30, 42, 11

(b) 23,  $\textcircled{70}$ , 49, 53, 39

(c) 36,  $\textcircled{63}$ , 52, 46, 60

(d) 69, 90, 79,  $\textcircled{92}$ , 88

(e) 5, 35, 27,  $\textcircled{59}$ , 11

(f) 45, 25, 15, 35,  $\textcircled{85}$

(g) 70,  $\textcircled{80}$ , 50, 60, 40

(h) 21, 34,  $\textcircled{55}$ , 18, 19

#### 2. Colour the greatest number in each of the following collections.
