

12.11.21

Ans The average of first nine numbers = 21

The average of last three numbers = 17

So total average of first 9 numbers = $9 \times 21 = 189$

So total average of last three numbers = $3 \times 17 = 51$

~~Total~~ Total Average of 12 Student = $189 + 51 = 240$

The average of 12

~~Total~~ Total average of 12 Student = $240 \div 12 = 20$

So the average 12 Student = 20.
