

10.12.21

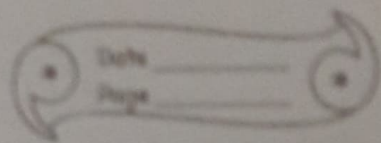

- Mention the names of all the Simple machines and write a use of each in our daily life.

Ans There are Six primary types of Simple Machines : pulley, Screws, Inclined plane, wheel & axle, wedge, & lever.

These Simple machines are used in more complex devices every day, making tasks much easier.

- pulley is used to lift something.
- Screw are used to hold things together as they pull or push the object.
- An inclined plane, also known as a ramp is a flat supporting surface tilted at an angle.
- Wheel and axle, basic machine component for amplifying force it is used for m it was probably used for raising weights or water buckets,

• A wedge is a simple machine used mainly to put in between two stones, a wedge as a tool can be also used to push two things apart such as the blade of sword and knife ~~etc~~ it cuts the ~~things~~ things into two parts

• Lever usually is used to move or lift objects.
