

## Oral questions

1. Cactus is a desert / aquatic / terrestrial plant.
2. In marshy / desert / hilly areas, the soil is clayey and sticky.
3. Duckweed and water lettuce are underwater / ~~the~~ fixed / floating plants.

The roots of the plants of the grass family help to conserve soil. How?

Ans:- The roots of the plants of the grass family are fibrous and hold the soil very tightly and firmly, so they help in conservation of soil.
