

Plastic Pollution

By: Adushka

Plastic is everywhere nowadays. People are using it endlessly just for the comfort and easy life. However, no one realizes that soon it is harmful to our planet. Plastic pollution

Plastic pollution is becoming more and more of a global problem. Plastic has become one of the most used substances. It can be seen everywhere from supermarkets to common household. Plastic is very cheap. Its cost is less than other alternative like paper and cloth. It is affecting the whole earth including mankind, wildlife and aquatic life. It is spreading like a disease which has no cure. We must realize the harmful impact it has on our lives. It pollutes our water. Every year tonnes of plastic are dumped into the ocean. As we know that plastic doesn't dissolve it remains in the water hampering the purity of water. It also pollutes

our land ~~also~~ as well. Nowadays humans are dumping the plastic wastes into the landfills for which the soil get damage. ~~That~~ It ruins the fertility of the soil. For addition to this various types of diseases - carrying insects get gathering in that area causing deadly illness.
