

# GEOGRAPHY

## Important parallels :

- The equator or  $0^{\circ}$  latitude.
- The Tropic of Cancer is at an angular distance of  $23\frac{1}{2}^{\circ}$ N from the equator.
- The Tropic of Capricorn is at an angular distance of  $23\frac{1}{2}^{\circ}$ S from the equator.
- The Arctic Circle is at an angular distance of  $66\frac{1}{2}^{\circ}$ N from the equator.
- The Antarctic Circle is at an angular distance of  $66\frac{1}{2}^{\circ}$ S from the equator.

These parallels help differentiate the temperature zones of the Earth.
