Q) Some people conclude that political and social divisions should not be allowed to mix. Support this with arguments?

Ans. Because;

- 1) Our country follows a democratic political ecosystem. Which means political powers and rights are available for everyone without any divisions in terms of religion, race, caste etc.
- 2) We involve social divisions in the political system. We have to redefine our whole political ecosystem because our current political ecosystem is not made for allowing any kind of social division.
