

HW

1. Do you think the classification of economic activities into primary, secondary and tertiary is useful? explain how.

A. Yes, classification of economic activities into primary, secondary and tertiary sector is useful as it helps in estimating the relative importance in the growth in GDP of the economy. classifying in such a way helps in calculating how much goods and services are produced and how many people work in each sector.

- make a long list of all kinds of work that you find adults around you doing for a living. In what way can you classify them? Explain your choice.

A- Following list of all kinds of works that adults are doing for a living:

Teacher, Doctor, engineer, electrician, cattle rearer, shopkeeper, washerman, milk vendor, farmer, insurance manager, government employees, sweeper, domestic worker, factory owner, vegetable grower, work at a construction site.

(i) Primary sector: Farmer, fruits and flowers growers, vegetable grower and cattle rearer.

(ii) Secondary sector: work at a construction site, factory owner.

(iii) Tertiary sector: Engineer, Doctor, electrician, teacher, shopkeeper, washerman, insurance manager, government employees, domestic worker, sweeper.
