

Q. A train travels to reach its destination = 6 hours

20 minutes

Since 1 hour = 60 minutes

$$\text{So, 6 hours} = 60 \times 6 = 360 \text{ minutes}$$

$$\text{Thus 6 hours 20 minutes} = 360 + 20 = 380 \text{ minutes}$$

∴ The train travels for 380 minutes.

Q. Mr. Rajan stayed in a hotel = 5 days

Since 1 day = 24 hours

$$\text{So, 5 days} = 24 \times 5 = 120 \text{ hours}$$

∴ They stayed in the hotel for 120 hours.
