Short Answer

Robert Hooke

Robert Hooke coined
the term cell.

The outermost cell

membrane called

Plasma membrane. The

cytoplasm and the nucleus

are the three parts of

The cell.

Long answers

Q-103 - The Scientist used Robert Hooke's microscope to observe cork under his microscope of dead wood. The microscopist observed the cork and saw many very thin slices of the cells in the wood. The slices were always dead and empty.
