HOMWORK

Physics

1. Define light.

Ans - Light is a form of energy that reflects our eyes to produce the sensation of vision.

2. Differentiate natural sources of light and Artificial sources of light.

Ans - The natural object that emit their own light are natural sources of light and the object that reflect the light or others is the artificial source of light.

3. Ans - The difference is that

Luminous emit their own light and non-luminous reflect the light of other luminous object.

4. Ans - The light travelling in any one ~~at~~ direction in a straight line is called a ray of light.

5. Ans - A group of light rays given out from a source is called a beam of light.
