

# 4

## Comparison of Numbers

### 4.1 Equal and Unequal

There is one extra apple in basket A.

So, we say that there are unequal number of apples in the two baskets.

Neha took 1 apple from basket A.

Now, there are equal number of apples in both the baskets. The symbol ( $=$ ) means that the numbers on its either side are equal. e.g.  $4 = 4$

### Exercise

Put the sign ' $=$ ' or ' $\neq$ '.

- |                  |                  |                  |
|------------------|------------------|------------------|
| (a) 12 $\neq$ 17 | (c) 57 $\neq$ 51 | (e) 64 $\neq$ 44 |
| (b) 33 $=$ 33    | (d) 70 $\neq$ 80 | (f) 92 $=$ 92    |
