

1) Draw the diagram of female reproductive system.

2) Differentiate between spermatogenesis and oogenesis.

Answer

2) Spermatogenesis

Oogenesis

- The main feature is the production of the sperm from spermatogenesis. Not all ~~are~~ only the last stage of spermatogenesis.
- The main product is one of the ova from oogenesis. Not all ~~are~~ only the last stage of oogenesis.
- All stages take place in the testis.
- Oogenesis takes place in the ovary.
- The growth phase is short.
- The growth phase is extended.
- The sperm are released from the testis.
- The ova are released from the ovary.
