

HW

1) what is 10% law related to food chain.

2) what are the different types of relationships between the components of ecosystem.

Name them and give one example from each.

Answer

1) The 10% law is related to food chain as the producer produces the food & transfer the energy through the food while transferring it to other organisms 10% energy gets decrease.

2) The different types of relationships are of various components of ecosystem are:-
• Biotic and abiotic

Biotic → Plants, Animals etc.
Abiotic → Sunlight, air etc.
