

- 1) Why adrenal gland is named so?
- 2) Name the emergency hormone when it is secreted?
- 3) Pancreas acts as both endocrine and exocrine gland. Explain.

Answer

- 1) It is named adrenal gland because it can take control on our nervousness and enzyme and help us to recover from that.
- 2) Adrenaline is an emergency hormone. It is secreted during the stress.
- 3) In endocrine gland ~~pancreas~~ pancreas is used as Insuline and in exocrine gland it's use for secretion of pancreatic juices containing several enzymes.
