

Ch-2

- 1-) Why vegetative reproduction is named so? write the different types of vegetative reproduction with one example each.
- 2-) Name the primary and accessory parts of a flower.
- 3-) Draw the diagram of a fruit and label the parts.
- 4-) Name the different steps of artificial hybridization.

Answer

- 1-) It is named because it can be used by natural and

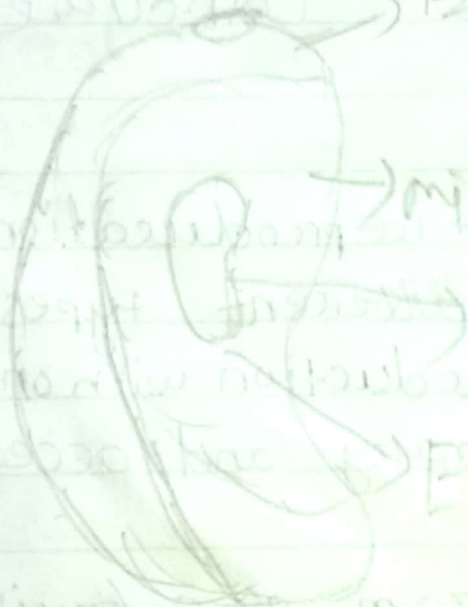

artificial. There are two types of vegetative propagation are :-

• Natural → e.g. → Bryophyllum and Ginger.

Artificial → Rose and Jasmine

2 → The primary part of a flower is Androecium and the secondary part of flower is Gynoecium.

3 ⇒

4) The different types of artificial hybridization

• Emasculation

• Bagging

• Breeding
