HW

Provide a short description of the chimney sweeper in 50-80 words.

This is a poem which describes about child labour where the author described the past America and Britain where all the child were brought for child labour without their parent permission. That is without their interest. They only like a labourer only for money. Here the author is a chimney sweeper and is a child of 12 to 13 years and is doing child labour. In most countries it is banned but in some countries this process is also there. Somewhere the rules are not listened by the people.
