

HW

1-) mention factors responsible for the uneven distribution of population in the world. Give example.

Answer

1-) The distribution of population in the world is uneven. Some areas are very crowded, while some are sparsely populated. There are various reasons behind uneven distribution:

- Geographical factors → Favourable topography, availability of mineral and freshwater resources, favourable climate and soil fertility are some of the reasons affecting population distribution. India, Gangetic plains, diamond mines of South Africa etc, are densely populated.

2-) Social and cultural factors → Areas of better housing, education and health facilities are more populated. Places of religious and cultural

significance also attract people e.g. →
Vivranasi, Jerusalem etc.

Economic factors → Places having more
Do industries, transportation and
communication facilities provide
better attracted to these places beca
of these reasons e.g. → Mumbai
Osaka etc.
