

Q. If you want to grow wheat, write the kind of soil would you need?

- Ans:-
- 1- Wheat is best grown in loam soil
 - 2- Because loam soil contains same amount of clay
 - 3- Sand and water which is good wheat to grow
 - 4- The loamy soil has enough humus there for it is the best soil for growing crops like wheat as they need enough ventilation of air and also enough space for the crop to grow
