

# BEAKS OF BIRD

1 - Strong sharp and hooked

Eagle, Owl, Hawk

2 - Short, hard and horny beak

Sparrow, Pigeon, Finch

3 - Curved beak

Parakeet

## Strong, sharp and hooked beak

Falcons, vultures and kites of prey. They eat small animals like chicks, mice, frogs and snakes. They have strong sharp and hooked beaks to tear flesh.

## Short hard and horny beaks

Sparrows, pigeons, peacocks and finches have short, hard and horny beaks to crush grains and seeds.

## Curved Beaks

The curved beak of parakeet helps it to crack nuts and hard fruits. This curved beak also helps it to climb trees.
