CH-5 Light

Q1) Define light energy. ↓

Q2) Differentiate luminous & non luminous body.

Ans 1) Light is a form of energy that affects our eyes to produce the sensation of eyes.

Ans 2)	Luminous body	Non luminous body
	The bodies which emit their own light are called luminous bodies	The bodies which do not emit light by their own, but become visible by the light falling on them.
	E.g., The sun, the stars, a burning candle, an electric lamp, etc.	E.g., Moon, book, table, chair, wooden log, etc.
