Exercise 15(E)

D. How many days are there from:

C) 4th June to 1st July 27 days.

Number of days in June = 30

Number of days from 4th June to 30th June
= 30 - 4
= 26 days

Now, number of days from 4th June to 1st July
= 26 + 1
= 27 days

d) 23rd December to 24th January 32 days.

Number of days in December = 31

Number of days from 23rd December to 31st December
= 31 - 23
= 8 days

Now, number of days from 23rd December to 24th January = 24 + 8
= 32 days

e) 11th February to 27th May 105 days.

Number of days in February = 28 days

Number of days from 11th February to 28th February = 28 - 11
= 17 days

Months between February and May are March and April. Total number of days in March and April = 30 + 31 = 61 days

Number of days on 27th May = 27 days

Total number of days from 11th February to 27th May = 17 + 61 + 27 = 105 days

F. Palvi came to my house on 10th January. She stayed with us for 40 days. On what date did she leave? 19th February.

Palvi came to my house on = 10th January

Number of days she stayed = 40 days

Number of days in January = 31 days

Number of days from 10th January to 31st January = 31 - 10
= 21 days

Number of days left = $40 - 21 = 19$ days

∴ She will leave on 19th February.

F. Look at the calendar given below. Answer the questions that follow.

1) Independence Day is falling on which day?

Ans - Wednesday

2) What will be the date on the last Friday of August?

Ans - 31st August

3) How many Thursdays are there in the month of March?

Ans - 5

4) How many Saturdays and Sundays are there in the month of June?

Ans - 9

5) How many Sundays are there in the whole year?

Ans - 52

6) on which day does October 2 fall?

Ans-Tuesday

7) What day is it on 1st July 2018?

Ans-Sunday

8) How many days are there in the months of May, June, July and August taken together?

Ans-123 days
