

# Nuclear Family

By Rome

In this era of busy life, the number of nuclear families has increased. In this time people believe that staying in nuclear family, will help their child learn moral values and can stay happy, which is actually not true. The truth is when children stay in joint families, they learn to stay with their ~~or~~ siblings and improve their relationships with ~~their~~ the member of the family. They learn to adjust with their situation and learn a lot from their experience. But we all believe that staying in joint families is not good, because in case of any conflict arising between the members, the children would grow like that. ~~It~~ We believe that in a joint family, children will develop a negative mindset, but instead of ~~attaini~~ living a nuclear life, we can improve the relationships within the member, so could the children improve a positive mindset and attitude. Study has proved that staying a joint family ~~or~~ improves morality of the children. They learn to stay with others and a joint family will help them to be

better persons. The children to live in  
a joint family are more likely to be  
open-minded and they are only the ones who  
could see things with other persons  
perspective. They learn to learn from their  
experiences and gradually develop into  
a good citizen. So, even and everyone  
should be encouraged to live in a joint  
family rather than staying in a nuclear  
family.
