① Example

- Imagine what would happen to cotton cultivation if companies decide not to buy from the Indian market & import all cotton they need from other countries. Indian cotton cultivation will become less preferable and the farmers may even go bankrupt, if they can quickly switch to other crops cotton prices will fall

(Let's look at the example of what does the flow)

This is an example of primary sector dependent on secondary sector.

③ Imagine what would happen if the prices of fertilizers & pesticides go up. Cost of cultivation of the farmers will rise and their profits will be reduced. ~~Therefore~~

This is an example of independence of both the sectors primary and secondary.

④ Imagine what would happen if there is a strike by transporters and lower refuse to take vegetables

This is an example of interdependence

with ite from ^{natural} natural
areas. Food will become
scarce in urban areas
whereas farmers will be
unable to sell their products.

of all the
3 sectors

② Explain why ^{the} differences between primary
secondary and tertiary sector with
examples other than those mentioned
in text book.

Primary sector -

This sector of the economy involves
conversion of natural resources into
primary products. Thus, this sector
is directly associated with nature.

Secondary sector

It includes those activities in which
natural products are changed into
others formed through manufacturing.

Tertiary sector

The activities that help in the development
of primary, secondary and ~~and~~ tertiary sectors.

are covered covered in tertiary sections

- (3) Classify the following list of occupations under primary, secondary and tertiary sectors.

Primary → flower cultivation, fishermen, Gardener, Potter

Secondary → Basket weaver, workers in metal factory, Bee-keeper

Tertiary → Tailor, music producer, poet, courier, money lender, astronaut, call centre employee

- (4) Students in a school are often classified into primary and secondary or junior and senior sections. What are the criteria used? Do you think this is a useful classification?

Yes there is a useful classification. This is because junior and senior

student not only different in aptitude but also different in their learning capacity or also different. In primary class attention is paid towards developing learning skills and base knowledge of the students. Once the base is strong at the primary level, at the secondary level the difficulty level of the subject increases and students are introduced to new subjects. This also ~~enable~~ ~~for~~ ~~the~~ ~~enhance~~, feasibility of teaching and providing learning aids to the student.

Question

Q Do you think the classification of economic activities into primary secondary and tertiary is useful? Explain how?

The classification of economic activities into primary secondary

and tertiary & useful. On account of the information it provides on how and where the people of a country are employed. It also helps in understanding of the various sectors of economic activity & contribute how much to country's GDP and per capita income.

③ Make a long list of all kinds of work that you find adults around you doing for a living in what way can you classify them? Explain your choice.

- Tailor
- Bread Basket weaver
- Flower cultivation
- Milk vendor
- Fisherman
- Teacher
- Woodworker in small scale industry
- Money lender
- Beekeeper

Astronaut

Physicist
Scientist

Civil servant

We can classify them on the basis of sectors under which their economic activity comes.

- Because some of them are employed in gaining natural products, ~~and~~ some are involved in producing the final goods & services to the people / consumers.
