

1) Write any two importance of Nervous system.

2) ~~Ans~~ What is the difference between nervous coordination and chemical coordination?

3) Draw a labelled diagram of neuron.

Answers

1) The two importance of Nervous system are:-

- ⇒ It controls our movement, thought and memory.
- ⇒ It also controls our breathing, blushing and blinking.

2) Nervous coordination:-

⇒ The nervous coordination is the complicated network of ~~nerve~~ nerves that carry messages or signals from and to the spinal cord and brain to other parts of body.

⇒ The nervous system shows the quick response to the stimuli, by the action potentials and neurotransmitters.

⇒ The response is spread widely. Duration of response is temporary and reversible.

3)
