Home Assignment

1) What do you mean by nervous coordination?

Ans- Nervous coordination is the coordination which was brought by means of nervous system which is the quickest way of communication in the body of an animal by electro-chemical messages called nerve impulse.

2) Define reflex action and reflex arc.

Ans- * Reflex action is the quick, immediate and automatic response to a stimulus without the involvement of the brain.

* The shortest pathway of the nerve impulse from a receptor to be effectors which makes a reflex action possible is called a reflex arc.
