## Banyan Tree

The Banyan Tree is also the national tree of India. It is a very huge tree with branches span upto 100m. The scientific name of Banyan tree is *Ficus benghalensis*. It is extremely beneficial as it ensure the purity of air by its ability to emit a large amount of oxygen. It's height is upto 10-25m. This fantastic tree was discovered at 1950. The tree is often symbol of the fabled 'Kalpa Vrکشha' or the 'Tree of Wish Fulfillment' as it is associated with longevity and has important medicinal properties. The immense size of the tree makes it a habitat for numerous creatures. In Hindu religion Banyan tree is known for its auspiciousness. They worship this tree as a God. Banyan tree is the pride of India, that's who should be proud of it and understand its importance.
