AD Word problems.

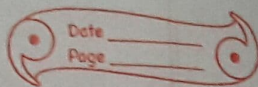

6. In a cricket match, the attendance on Saturday was 26695 and on Sunday, it was 48788. How many people witnessed the match on these two days?

(ans) Number of attendance on Saturday = 26695

Number of attendance on Sunday = + 48788

Total number of witnessed people = 75483

∴ So total number of witnessed people is 75483

Homework

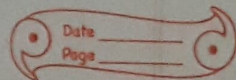

7. Amit purchased a vehicle for ₹ 73425. He then spent ₹ 9085 on repairs. How much did the vehicle cost him after the repairs?

(ans) Number of cost Amit purchased a vehicle = ₹ 73425

Number of cost he spent on repairs = ₹ 9085

Total number of vehicles cost and repairs = ₹ 82510

∴ So total number of vehicle cost him after the repairs is 82510

Homework

10. 37594 people watched the semifinal of the hockey world cup match, but 19070 more people watched the Finals. How many people watched the Finals?

(ans) Number of people watched the hockey match = 37594

Number of more people watched the finals = 19070

Total number of people watched the finals = 51664

∴ So, total number of people watched the Finals is 51664.
