Junction

Muscular Tissue : Types, Location and Function.

Three Types of Muscular Tissue

Location

Skeletal

Location - Skeleton. Function - Movement, heat, posture

Appearance - striated multinucleated (eccentric), fibers

A parallel. Control - Voluntary.

Cardiac

10/5/21

Importance of Muscular Tissue

- It is made up of muscle fibers which are long cells. It allows movements.
- Cardiac muscles help in continuous contraction and relaxation of heart without fatigued.
