Ch-2- Latitudes and Longitudes

Q1) What is a globe?

Ans:- A globe is a three-dimensional model of the Earth in miniature.

Q2) What do two points one at top and another at bottom denote on a globe?

Ans:- The two points one at top denotes North Pole and ~~the~~ another at bottom denotes South Pole on a globe.

Q3) What do we understand by the term 'Axis of the Earth'?

Ans:- An imaginary line running through the centre of the Earth from the North to the South Pole on which the Earth spins is known as 'Axis of the Earth'.

Q4) Which latitude divides the Earth into two halves?

Ans: - The Equator divides the Earth into two halves.

Q5) Define latitudes.

Ans: - Latitudes are imaginary lines running horizontally across the globe.

Q6) Name some important latitudes.

Ans: - Some important latitudes are the equator, the Tropic of Cancer, the Tropic Capricorn, the Arctic Circle and the Antarctic Circle.
