

Let us consider another example : Number 90

Here face value of 0 ones  
is zero and the face  
value of 9 tens = 9.

- Note :**
- For a digit in ones place, place value = face value.
  - Place value of a digit = face value  $\times$  value of its place.
  - The place value and face value of zero is always zero.

### Exercise

Write the face value and place value of the underlined digits in the following numbers.
